RENUMBER CAMS

PATENT SAR/14779

43. The apparatus of claim 42, wherein the capture section further comprises a liquid collection chamber coupled to the at least one channel.

The apparatus of claim 42, wherein the at least one channel is for transporting the liquid to at least one of a fluid collection or fluid-particle analysis device.

The apparatus of claim 37, wherein the hydrophobic membrane is comprised of a fluid-repellant mesh.

The apparatus of claim 37, wherein the apparatus further comprises an electrostatic precipitator section comprising:

a corona electrode positioned substantially between the intake assembly and the separation section; and

a plurality of charged precipitator plates disposed proximate to a first end of the separation section.
